Visual Artists Assosiation Cyprus

Nicosia, Cyprus

MODUS OPERANDI 17, Group Exhibition for
55 Cypriot Artists under 35 years old.

www.momomo17.com

MODUS OPERANDI

Modus Operandi 2017 (MO17) deals with emerging artists under the age of 35, and during their early professional stage. It aims to present their work and practices, as well as their connections to local culture and the world, as they currently stand.

The program aims to create the conditions for an alternative and pluralistic, experimental archive that documents today, as well as in the long-run, the artistic vigour of local artists. Taking the form of a publication, website and exhibition, the archive is designed to operate at a local or international level, to connect directly with artists whose work resonates with their interests. Consequently, the archive offers an overview of an emerging art scene in Cyprus, creating a place for meetings, discussion and exchange.

Modus Operandi is a project realised by The Visual Artists Association Cyprus (E.I.K.A.) which was founded in 2008 in Nicosia, as an association of artists. Today, it represents a large number of prominent artists and art groups whose work is for the promotion and progress of local art and culture. The aim of the association is to support the rights of artists and to create a legal framework for the status of the artist, including medical care, social security and pension above.

YORGOS PETROU

Chelsea College of Art and Design, and Royal College of Art
Lives and works in London, UK

Yorgos Petrou (b. 1981) has participated in group shows: Planètes, Pafos (2017) curated by Elena Parpa; Electric Blue, Galeria Vermelho, São Paulo (2016) curated by Maria do Carmo M. P. de Pontes; Identity!er, 5th Biennale of Thessaloniki (2015) curated by Dimitris Michalopoulos, Anthi Argyriou, and Panagis Kotsopoulos; Journeys, Institut Space for Contemporary Art, Berlin (2015) curated by Gillian Wearing; and Landmarks, Royal College of Art, London, and Museum of Contemporary Art, Athens (2015). Bloomberg New Contemporaries (2011) ICA, London. Petrou holds an M.A. in Photography, Royal College of Art, (2011) and a B.A Fine Art, Chelsea College of Art and Design (2008).

In this conceptual context, the artist also looks at the human body mythologically, culturally, physically, and emotionally. By displacing and separating it, he creates a space of individuality, hybridization, surface, heronism, trauma, and dichotomy. Petrou uses photography and sculpture to address aspects of individual and national identity embodied in the landscape, and formed in relation to the geological forces of a place.

ELENI PHYLA

University of Thessaloniki, School of Visual and Applied Arts and the Aristotle School of Fine Arts
Supervisors: Giannis Kyparissidis and Manolis Siliopoulos
Lives and works in Cyprus

Eleni Phyla (b. 1989) studied Fine Arts at the Aristotle School of Visual and Applied Arts in 2007-2009. In 2016 she graduated from the Athens School of Fine Arts. Between 2011-2012 she was part of the Erasmus programme in Paris at Ecole National Supérieure des Beaux Arts at the studio of Claude Closky and Emmanuel Saunier. On 2017 she worked in art education for the European School of Education of Heraklion, Greece.

Eleni Phyla's work has a conceptual orientation and takes different forms. She explores the boundaries between art and life, and is focussed on concepts. Her principle when working is to use literally any medium or media, which, in effect, will help convey individual ideas.

She often appreciates more basic ways of expression, which translate into pencil on paper.

SPYROS PROCOPIOU

Aristotle University of Thessaloniki,
School of Visual and Applied Arts
Supervisor: George Skyligianis
Lives and works in Nicosia, Cyprus

Spyros Procopiou (b. 1990) joined the department of Visual and Applied Arts at the Aristotle University of Thessaloniki in 2011 and obtained a BFA degree in 2016. His main study field was drawing and painting with professor George Skyligianis, supervisor Evangelia Nomidou, and professor Christos Venetsas.

Procopiou was accepted at the Art Department of Drawing of the New York Academy in addition to being awarded the President's Scholarship for an MFA degree in 2017. He has participated in several group exhibitions and his artwork can be found in private and/or public collections. He primarily works with pencil and charcoal.

Spyros Procopiou's work begins at the "thin line" that defines death and eroticism, in all its magnitude, by the body as a benchmark. The research is based on deformity, "lines", human experimentation and need. The artist uses the body as a reference point and the body as the embodiment of the subject to the acceptance of personal information alone, shape the composition of the surface as intangible entities of an absent space. The subconscious consolidation of human beings - an integration of innocence together with the ugliness of a torturous form turned out to be the main theme of his work. The impersonal process of research has been converted to the personal. Finding photographic

NAYIA SAVVA

Camberwell College of Arts, University of the Arts, London
Lives and works in Nicosia, Cyprus

Nayia Savva (b. 1987) completed her studies in drawing at the Camberwell College of Arts in 2015. In 2012 she had her first show, AAIHOON-GAH a hornlike sound signifying the end of the world, at Kontineir in Limassol, and in 2017 she had her second show, L-E-E rock place a curatorial project hosted by the artist-run space, Neoterismos Tournouris. Recent group shows include: So close yet so far away, 2017, curated by Hanius Tournouris at Petah Tikvah Museum of Art, Tel Aviv and AyebatDome: Super, 2018, curated by Peter Eramian, Thiki Ppalies, artist-run Space, Nicosia.

MARIA SPIVAK

University of Sussex, UK
Supervisor: Sally Jane Norman
Lives and works in Nicosia, Cyprus

Maria Spivak (b. 1989) received an MA in Creative Media Practice (Sound Environments) at the University of Sussex, having Sally Jane Norman as her main supervisor. She also received a BA in architecture at DeMontfort University. She has presented work at Short Psalm and has collaborated in exhibitions at Volks (2015) and BYOB at Photorio (2016), while also presenting music and sound pieces at various environments.

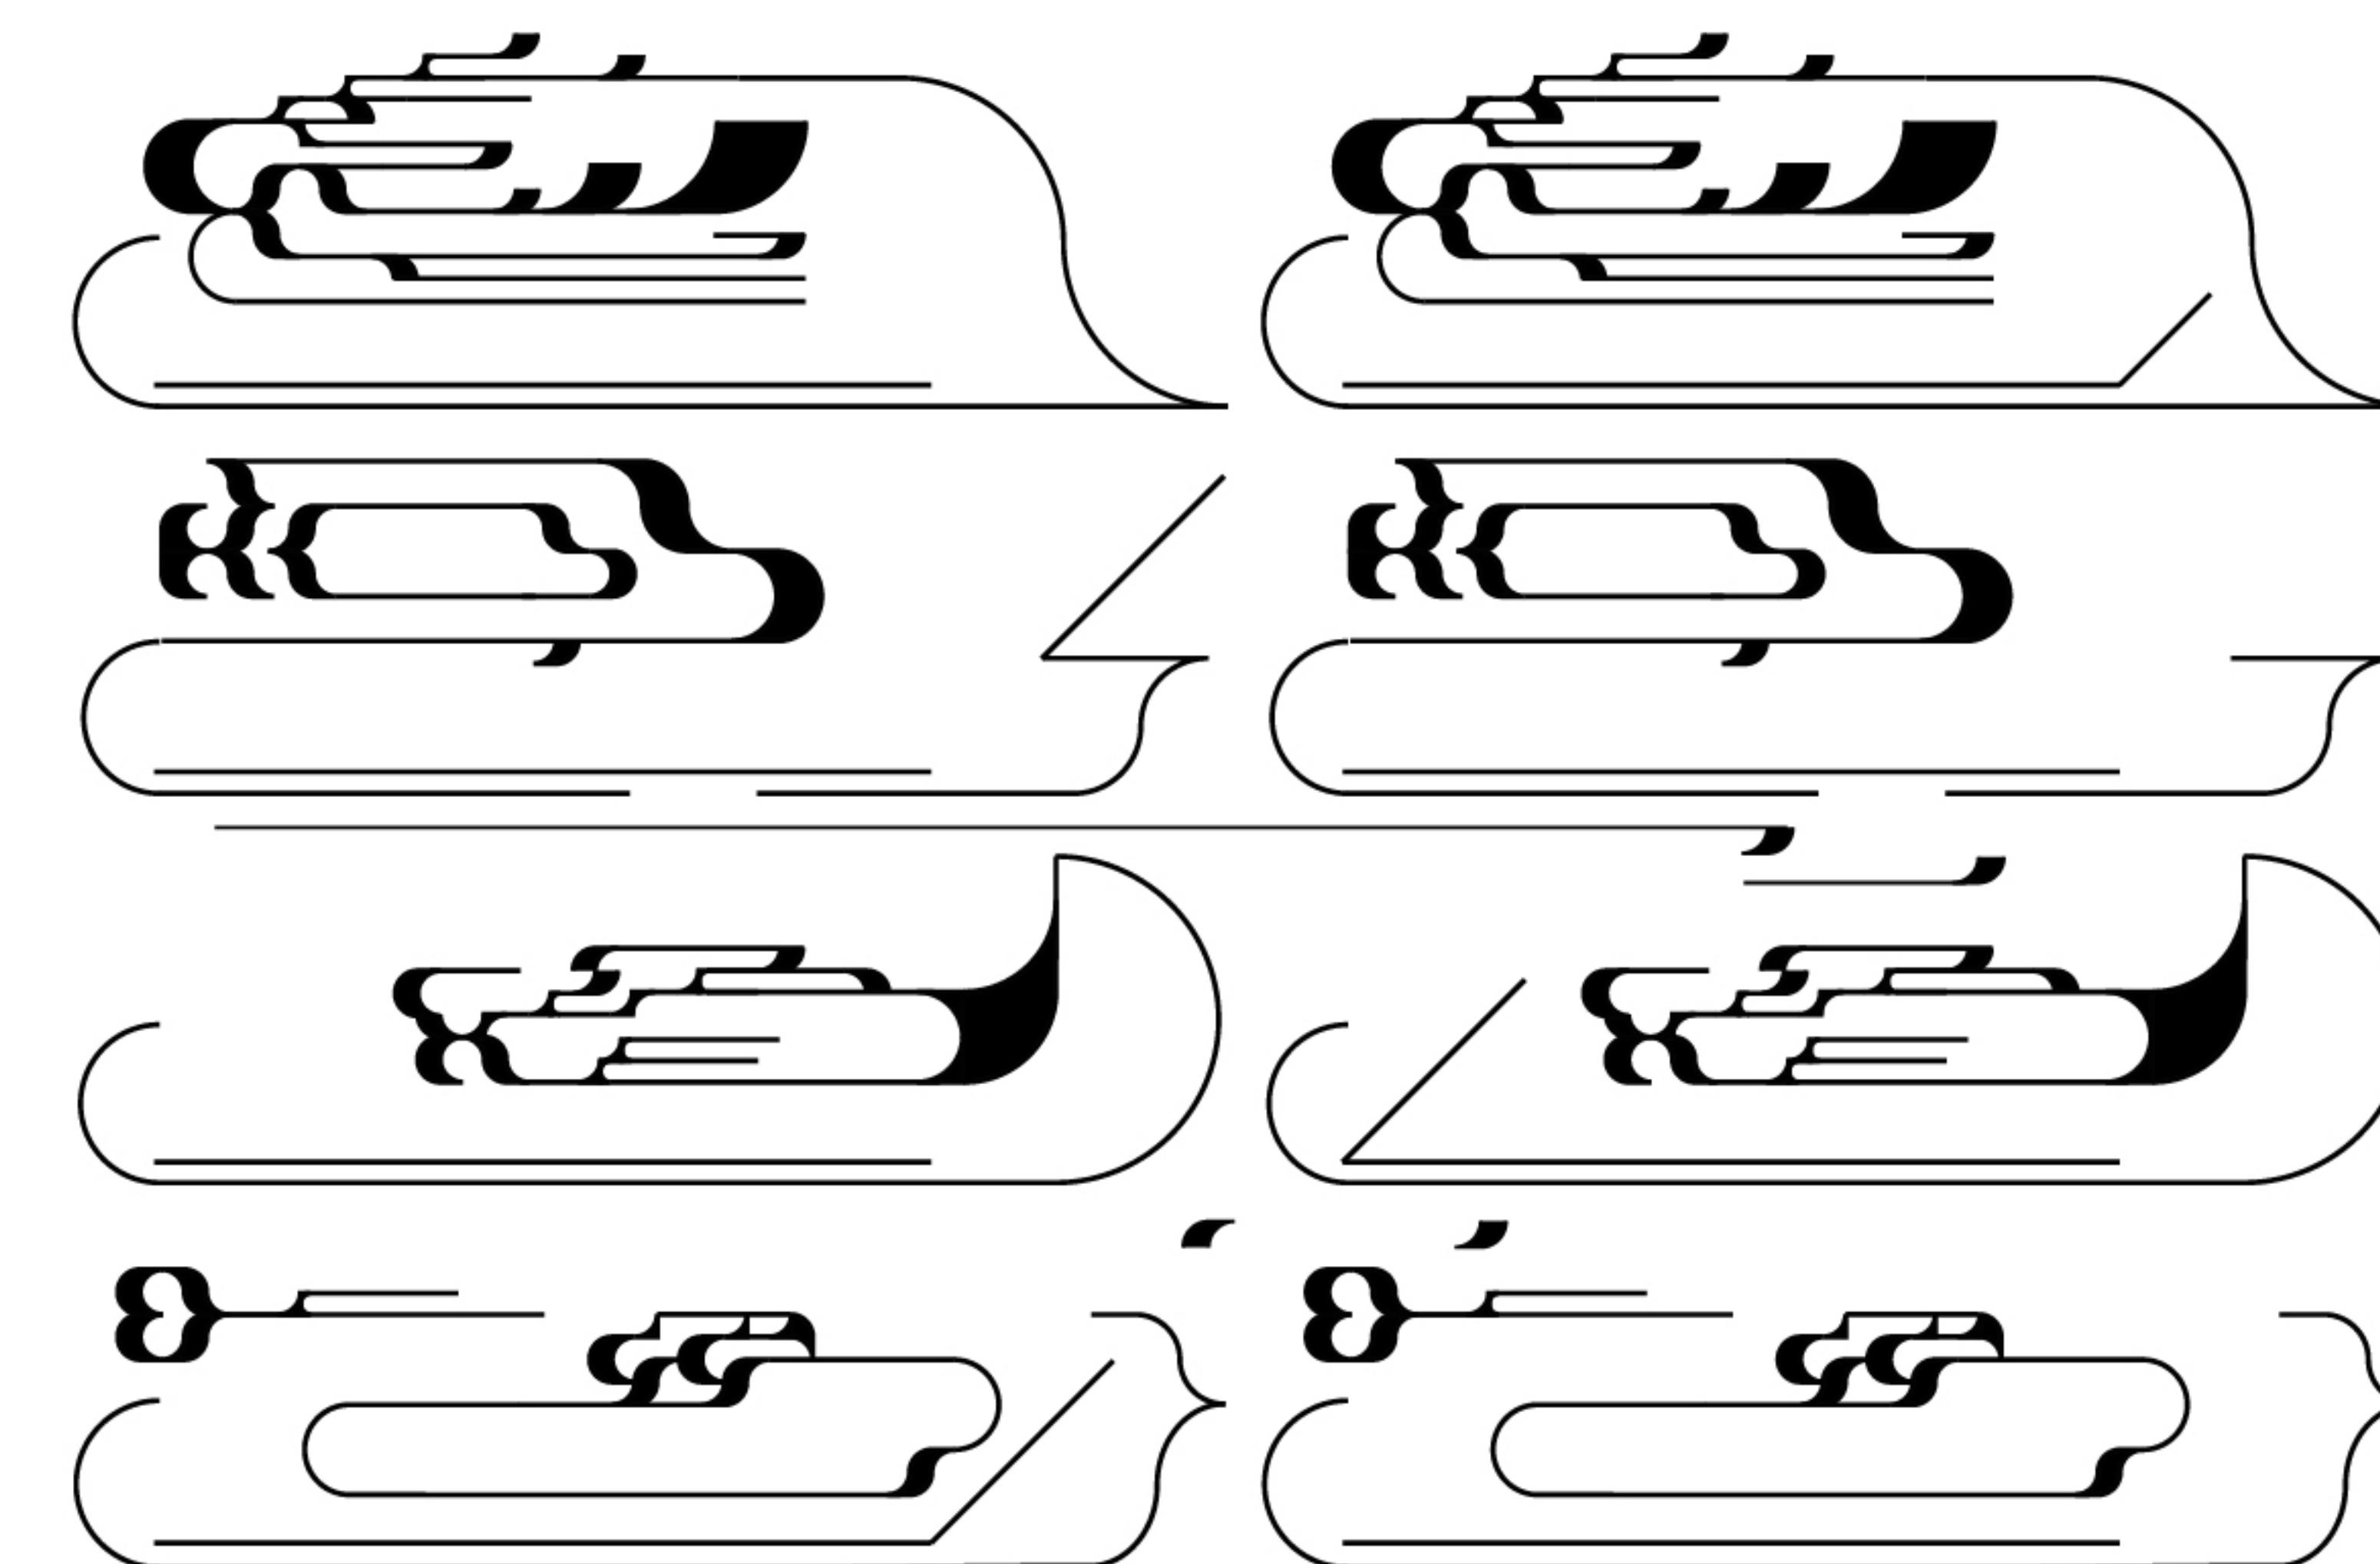

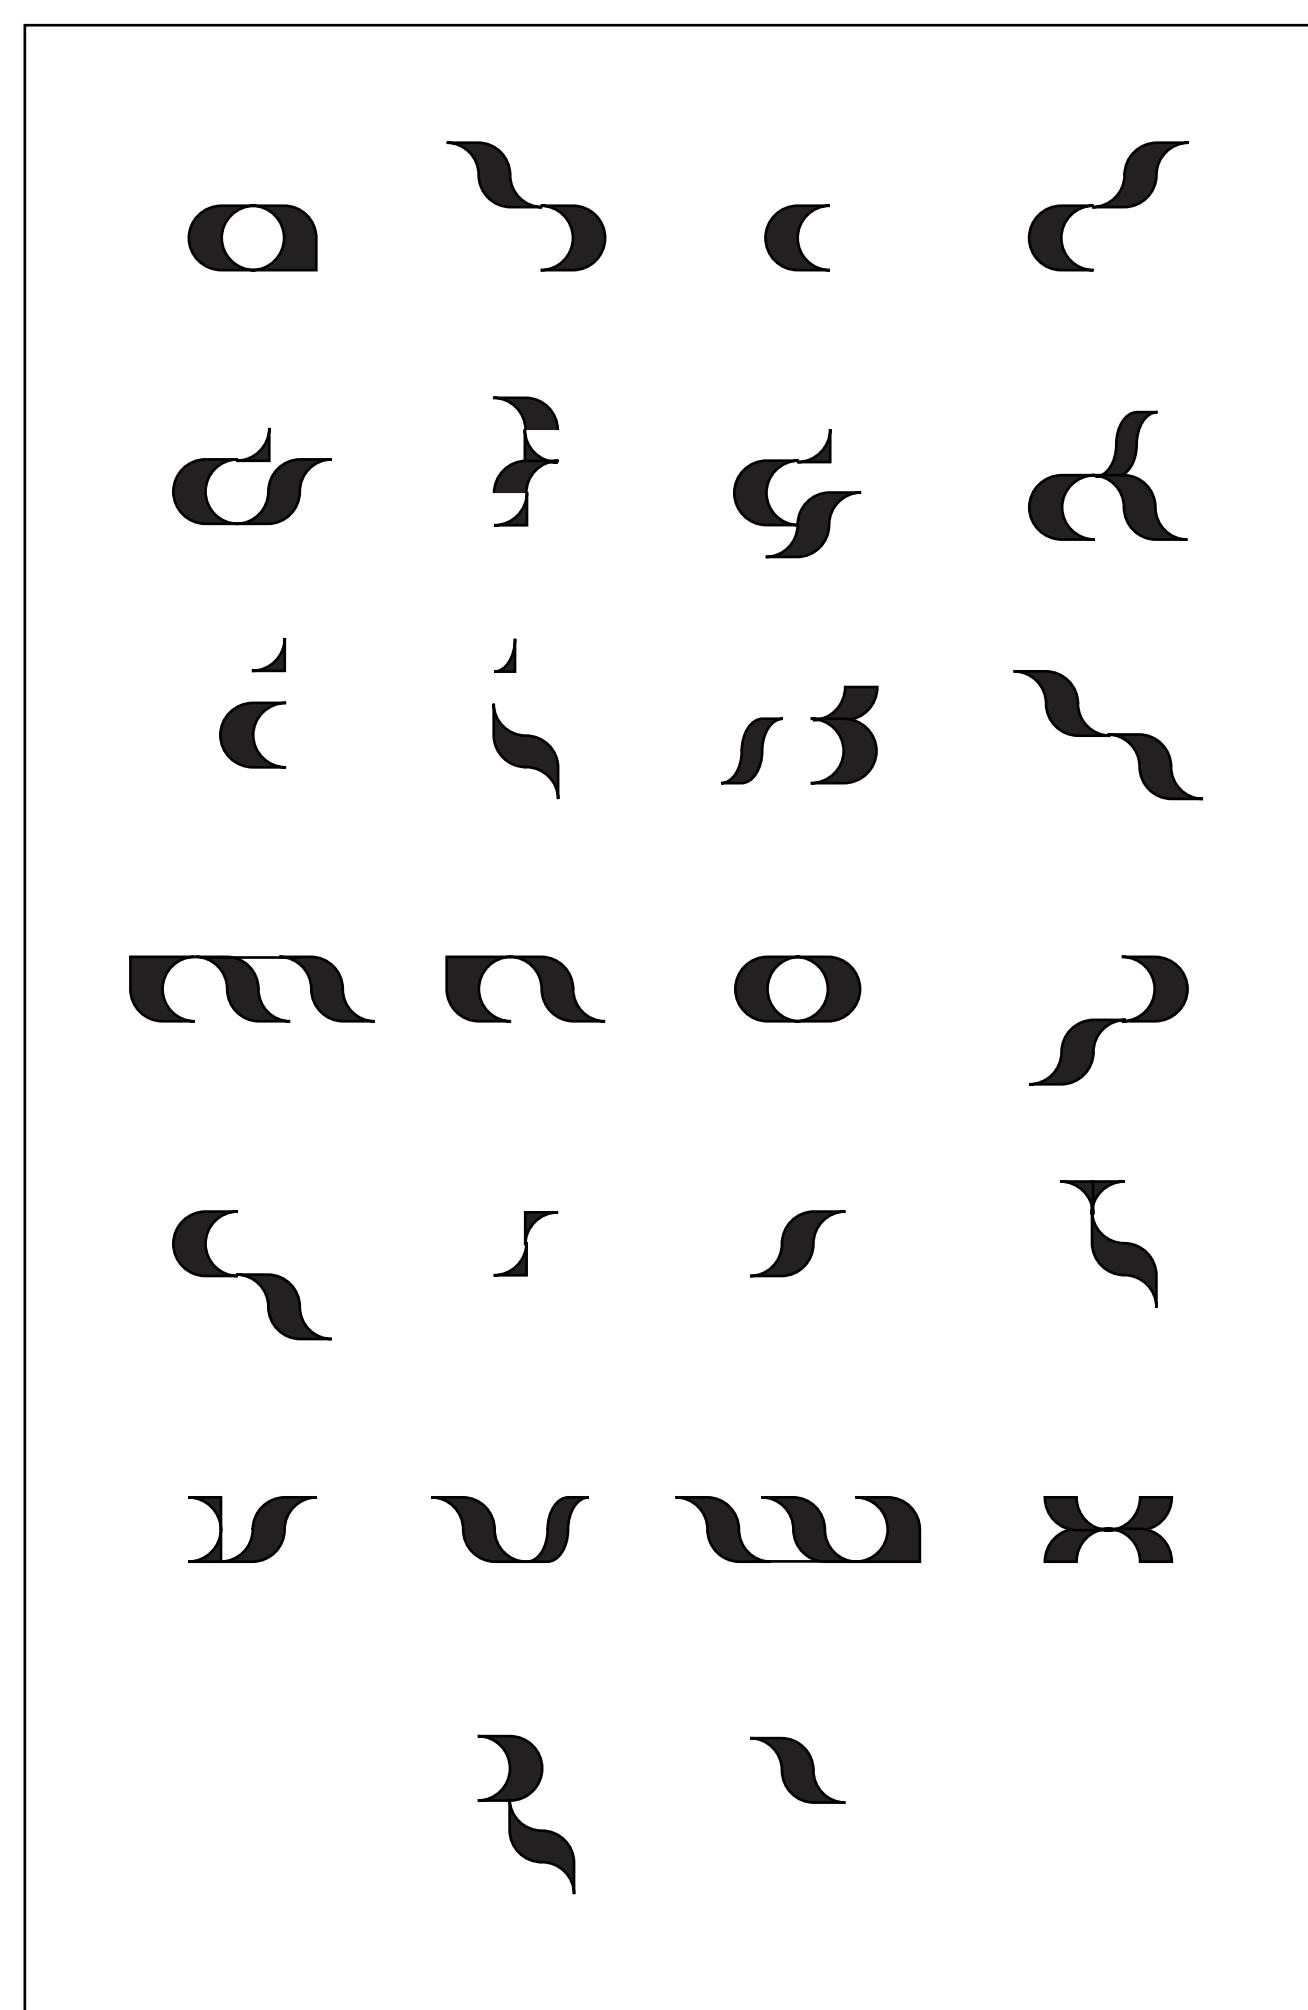

Maria Spivak works with sound and music. Her music project began in 2015 when she became interested in synthesis and pop songwriting. Her musical interests led her to explore the field of sound art. Her research into sound began earlier in 2011 when she was studying Sound Environments at the University of Sussex. Sally Jane Norman being her main supervisor, she developed a strong interest in sound art. This involves around the notion of spatial acoustics and psychoacoustics, when she began studying sound as a cultural phenomenon, from an anthropological point of view. Her practice with sound involves the use of large reverberating halls, largely a fascination with cathedrals, and the use of everyday objects as instruments in such environments. She creates her own electroacoustic sound pieces. As a former student of Sound Environments at the University of Sussex, Sally Jane Norman being her main supervisor, she developed a strong interest in sound art. This involves around the notion of spatial acoustics and psychoacoustics, when she began studying sound as a cultural phenomenon, from an anthropological point of view. Her practice with sound involves the use of large reverberating halls, largely a fascination with cathedrals, and the use of everyday objects as instruments in such environments. She creates her own electroacoustic sound pieces. As a former student of Sound Environments at the University of Sussex, Sally Jane Norman being her main supervisor, she developed a strong interest in sound art. The Gathering II: Journal

Publication Design

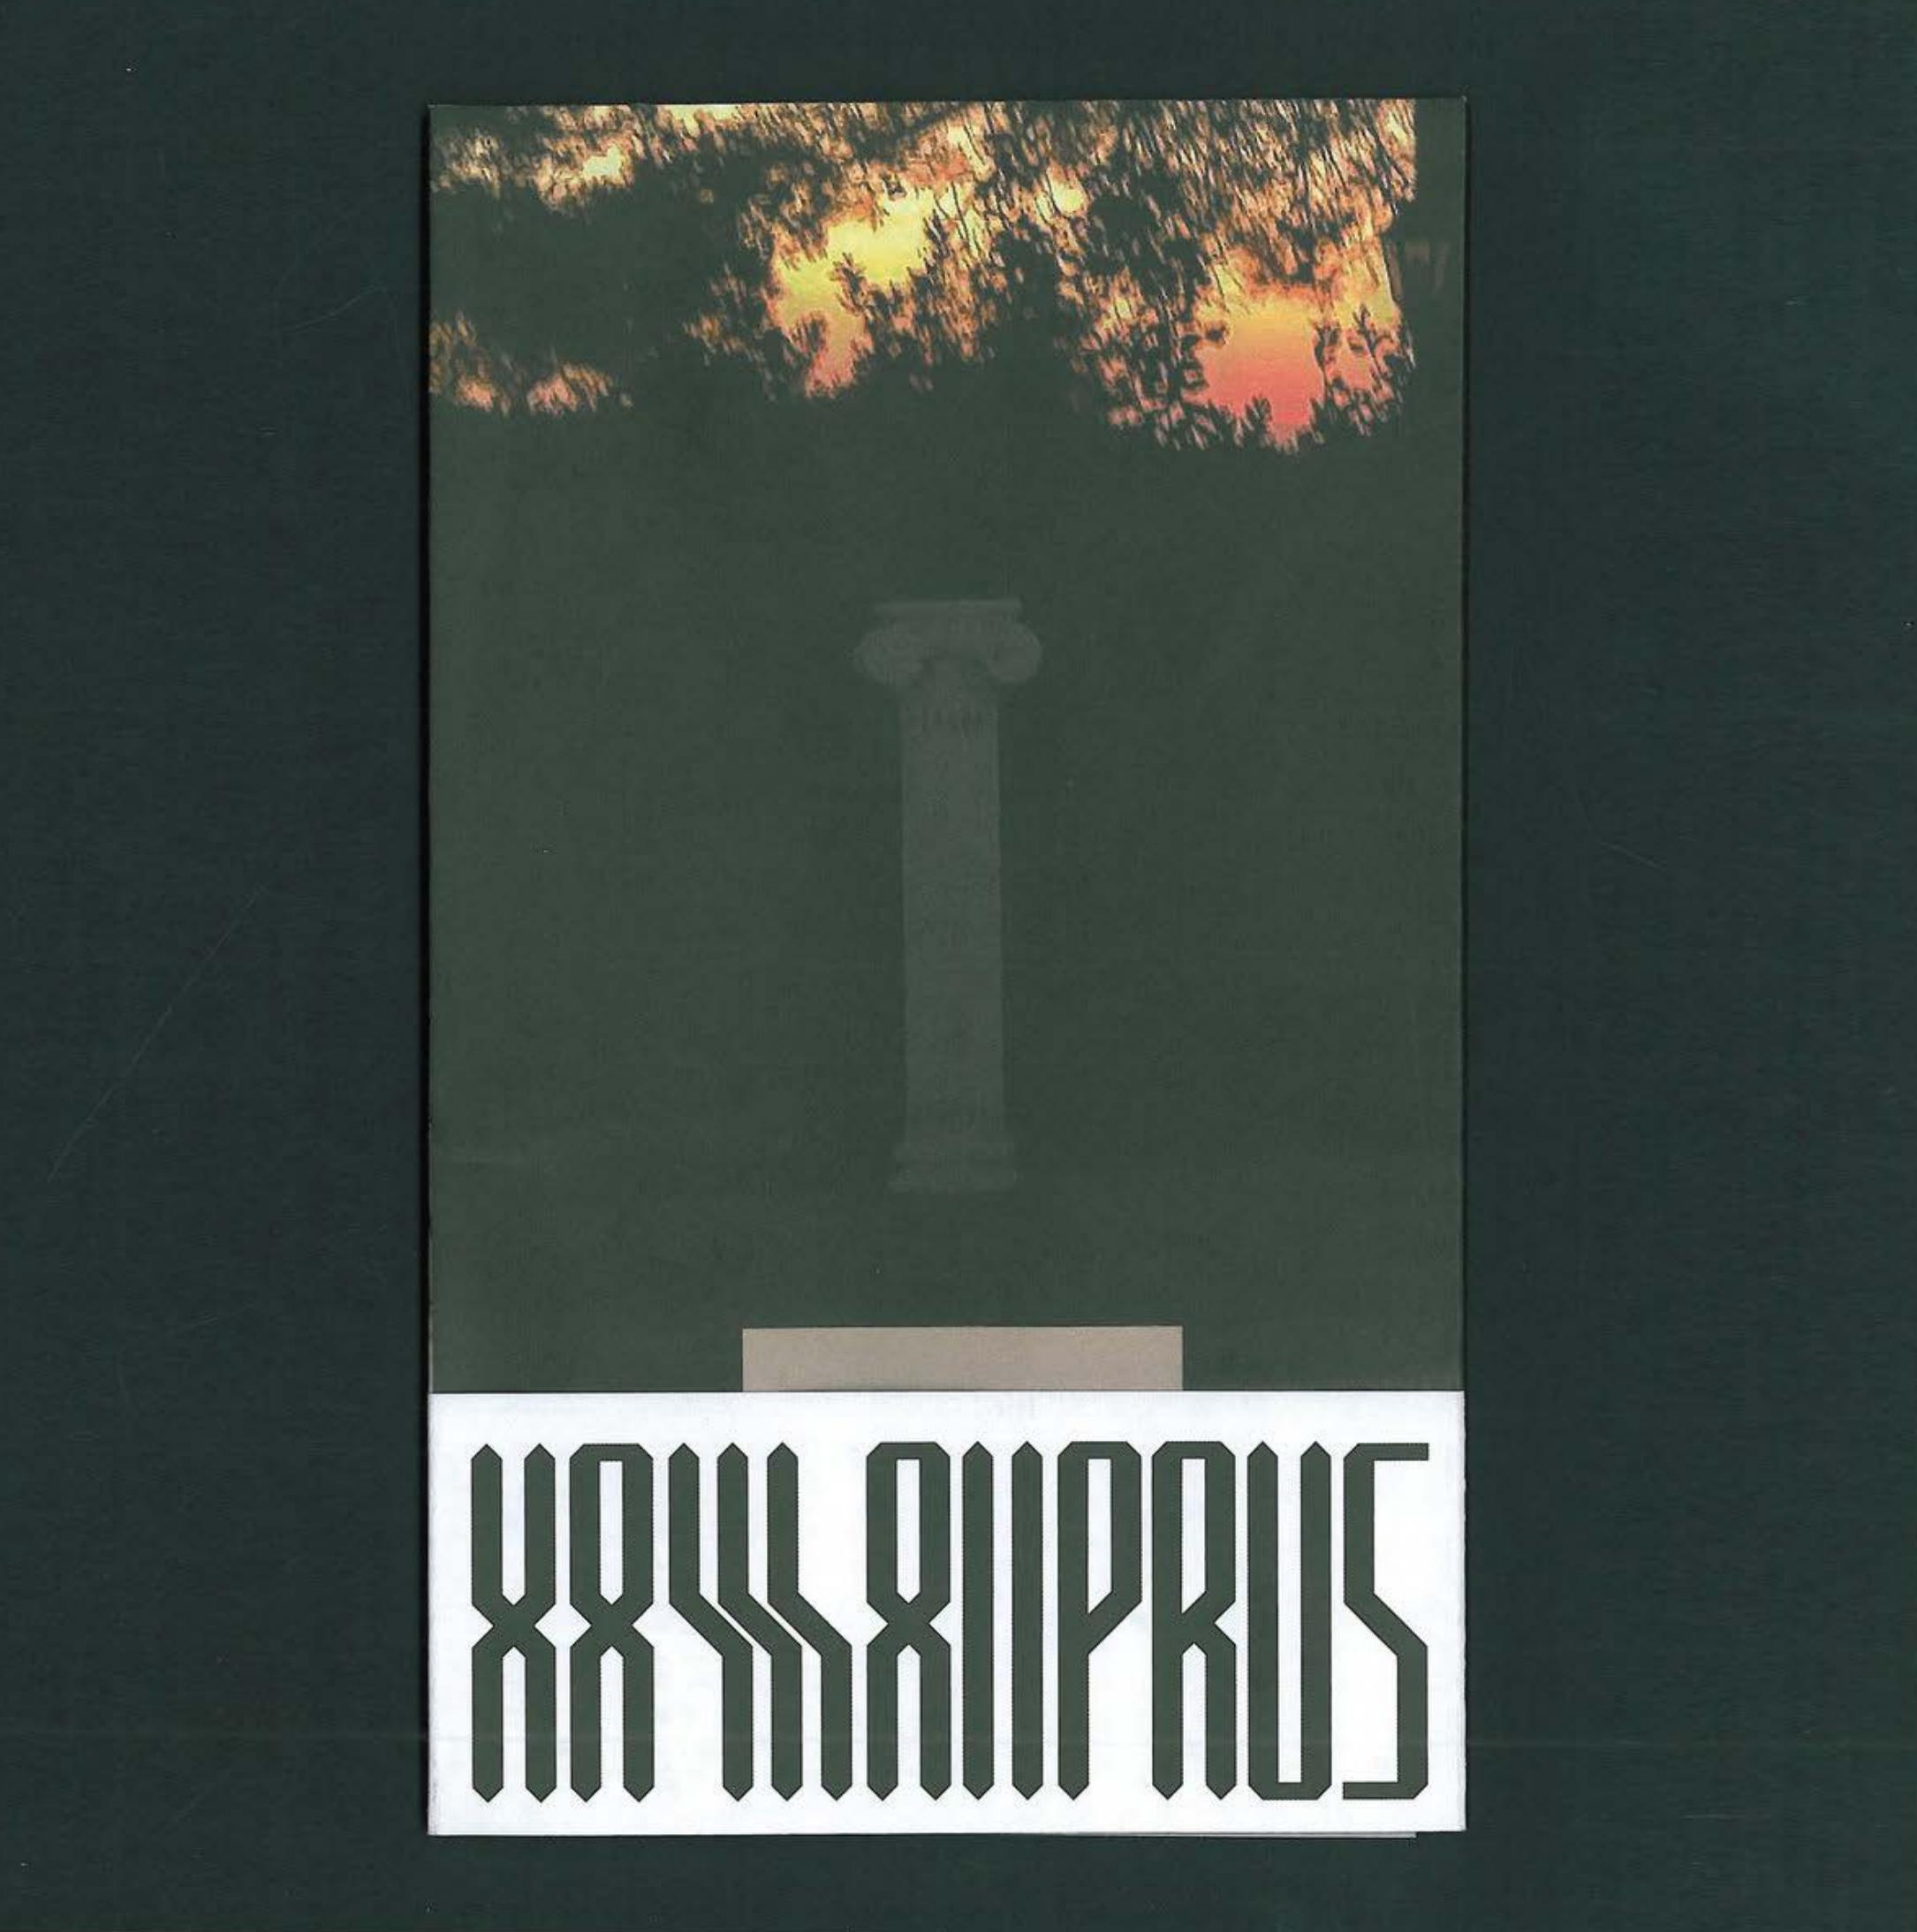

"The Gathering II: Journal" is an A5 zine that describes the activities that happened during the yearly festival "The Gathering" by Honest Electronics in Cyprus. "Seva" in Sanskrit is a service which is performed without any expectation of result or reward for performing it." Under this philosophy of selflessness and sustainability ethics a team of young artists have teamed up to create a collaborative festival. The journal is a compilation of all the projects that helped a self-organised community to blossom.

RAW SILVER, Album Release Press Images

I was born in 1990 in Nicosia Cyprus where I was academicly trained on drawing for seven years.

In 2011 I moved to Amsterdam where I was studying at Gerrit Rietveld Academie untill 2017.

Last summer I have gratuuated from the Graphic Design Department. My supervisors were David Bennewith & Emily Segal.

I'm currently freelancing in Berlin.

As a graphic designer I'm working on identities, printed matter, digital projects, visual research and experimental typography.

And an art director I have worked for multiple foundations, record labels and art projects.

I have also co-founded the community platform and record label Honest Electronics and the yearly festival "The Gathering" in Cyprus.

Currently I'm preparing for my exhibition at the 30th of November at Thkio Ppalies in Nicosia, Cyprus.
